EXPERIENCE

Business Analyst / Front End Developer

Prime Buchholz LLC // Portsmouth, NH // June 2016 – Present

Proactive and highly motivated change agent.

- Built a front end, mobile ready application using Vue.js for traveling consultants to write client meeting reports on the road.
- Built a Quick Base ecosystem that resulted in 30% less errors and a savings of 200% over prior system.
- Collaborated with teams to gather documentation, process requirements and user feedback.
- Implemented an enterprise research management system across four asset classes.
- Collaborated with various business segments to create improved workflows that led to better communication, improved turnaround time and increased accountability and visibility.
- Worked with AWS Lambda and API Gateway to automate emails through a third party API.

Full Stack Development Program

University of New Hampshire // June 2018 – December 2018

Built real full stack web apps under the guidance of area employers using Agile workflows and iterative product improvement processes.

- Developed an open source trivia database application using MySQL, Express, and Heroku.
- Worked with a team using Firebase and front end technologies to build a daily task tracker and weather application.
- Developed multiple projects utilizing all technologies learned throughout the class.
- Collaborated with team members to solve problems, set team norms and coordinate workflows.
- Assigned project team lead based on proven skills and leadership abilities.
